Experience

Front-End Development Trainee — **June 2024 – Present** | Remote

Information Technology Institute (ITI) – Ministry of Communications and Information Technology

- Studied and built responsive web applications using HTML, CSS, JavaScript, and modern frameworks.
- Developed dynamic user interfaces with React.js and managed state using Redux.
- Consumed and integrated RESTful APIs and handled data using asynchronous operations.
- Focused on writing clean, reusable code and following best practices in UI/UX.
- Collaborated in team projects using Git/GitHub and Agile methodologies.

Back-End Development Trainee — **June 2025 – Present** | Online

RewaaD Digital Egypt (رواد مصر الرقمية)

- Learning back-end development with focus on building robust and scalable web applications.
- Studying ASP.NET Core Web API and C# for building RESTful services.
- Working with databases (SQL Server) and writing efficient queries.
- Implementing authentication & authorization using JWT and Identity.
- Applying OOP principles and clean architecture in real-world projects.

Education

Sphinx University, Faculty of Computers & Artificial Intelligence — Expected Graduation: 2027

Software Engineering — *Egypt*

- 3rd Year Student – Relevant Coursework: Data Structures, Algorithms, OOP, Database Systems, Operating Systems, Computer Networks, Software Engineering, AI Fundamentals.

Projects

E-Commerce Web Application | React, ASP.NET Core, SQL Server — April 2025 – May 2025

- Developed a full-stack e-commerce platform with user authentication, product management, cart, and checkout functionality.
- Built RESTful APIs for product and order management and integrated with React front-end.
- Implemented role-based authorization and secure payment simulation.

Task Management System | HTML, CSS, JavaScript, Bootstrap, LocalStorage — Jan 2025 – Feb 2025

- Created a responsive task management web app to add, edit, delete and filter tasks.
- Used LocalStorage for data persistence and Bootstrap for UI components.
- Focused on a clean user experience and task categorization.

Weather App | JavaScript, OpenWeather API — Dec 2024 – Jan 2025

- Built a weather application that fetches real-time weather data using OpenWeather API.
- Allows users to search for any city and view temperature, humidity, and weather conditions.
- Implemented error handling and responsive design for all devices.

Student Management System | C#, Windows Forms, SQL Server — Nov 2024 – Dec 2024

- Developed a desktop application to manage student data with CRUD operations.
- Designed database schema and implemented data access using ADO.NET.
- Focused on validation, search, and user-friendly interface.

Technical Skills

Languages: C#, JavaScript, TypeScript, Python, HTML, CSS, SQL
Front-End: React.js, HTML5, CSS3, Bootstrap, Tailwind CSS, JavaScript (ES6+)
Back-End: ASP.NET Core, C#, RESTful APIs, Node.js (Learning)
Database: SQL Server, MySQL
Tools & Technologies: Git, GitHub, Visual Studio, VS Code, Postman, Swagger, Docker (Basic)
Concepts: OOP, Data Structures, Algorithms, Database Management, OS, Networking, SDLC, Troubleshooting

Achievements

- Completed Front-End Development track from ITI – Ministry of Communications and Information Technology.
- Currently learning Back-End Development with RewaaD Digital Egypt.
- Continuously improving problem-solving skills through online contests and coding challenges.
- Passionate about building scalable web applications and learning new technologies.
